## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9, 11, 12, 14 and 21-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Carlson (2,090,284).

Carlson shows a spray nozzle having a nozzle body 7, discharge orifice having a generally inverted teardrop configuration with a relatively larger area upper portion and a relatively smaller area lower portion arranged below the upper portion as can be seen in figure 3, hood 9 and pre-orifice member 23.

3. Claim 25 is rejected under 35 U.S.C. 102(b) as being anticipated by Stumphauzer et al. (3,737,108).

Stumphauzer et al. shows a spray nozzle having a nozzle body B defining an elongated internal flow passage, a downstream end wall having a convex configuration, a side wall and a discharge orifice in the end wall having a generally inverted teardrop configuration as can be seen in figure 1.

### ***Allowable Subject Matter***

4. Claims 10, 13, 15-20 and 26-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rabitsch, Robinson, Hegstad, O'Brien et al., Malcolm, and Johnson show spray nozzles in the general state of the art of the invention.
